

iq Clock Consortium Meeting

22 - 23 October 2019

The third iqClock consortium meeting took place in Innsbruck, hosted by the University of Innsbruck. Two days of interesting talks, updates and plans for the future were discussed in Claudiasaal, which was kindly provided by the BRITINN Academic Network of the University of Innsbruck.

As University of Birmingham and several British companies are partners within the consortium, the prominent connection to the UK allowed us to receive this generous support from BRITINN.
